## **DETAILED ACTION**

In light of the response filed 1/14/2005, the previous rejection has been dropped and a new action follows.

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hirose et al (EP1277594 or WO 01/83234).

Hirose et al disclose a lithographic printing plate precursor comprising a substrate and formed thereon a photosenstive polymer comprising a crosslinkable resin comprising a hydrophilic polymer, a crosslinking agent, and a light absorber, and may further comprise a hydrophobic polymer wherein the layer is ink-repellant and becomes ink receptive upon irradiation with light. The hydrophilic resin comprises 40-90% by weight of the composition. The reference teaches that compounds such as those comprising N,N-dimethyl (methyl) methacrylamide.

Given the teachings of the reference, it would have been obvious to one of ordinary skill in the art to prepare the material of Hirose et al choosing to employ a hydrophobic resin, which would inhibit hydrogen bonding in the light sensitive, with reasonable expectation of achieving a material having excellent printing properties.

Art Unit: 1752

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amanda C. Walke whose telephone number is 571-272-1337. The examiner can normally be reached on M-R 5:30-4.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cynthia Kelly can be reached on 571-272-1526. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
